

Changes to Create Deal:

Change First Name and Last Name to “Primary Borrower First Name and Primary Borrower Last Name.”

Add one field to Client information: Checkbox for “Married or common law”. If the box is checked, it populates a question asking, “Is the spouse on the application?” and a required checkbox “Check if no”. If yes, nothing further. If no, populates “Please includes notes in the credit section about the spouse’s credit and why they are not on the application.” If no, the credit notes become mandatory to fill out.

Add a checkbox to Deal Information with the FTHB checkboxes: “Reverse Mortgage”

Add to Qualifying Information after source of down payment:

1. “Total value of assets (liquid assets only)” and “Total value of all assets including non-liquid assets” These are required if the Networth box is checked on the previous page.
2. After asking how many doors, please add another numerical input asking how many titles the doors are on.
3. After asking if a loan has been previously declined, if yes, please add a drop down listing all the lenders that are signed up with LenderMatch. If any are Merix, RMG or MCAP, those lenders are automatically blocked from viewing the loan. (Is this possible to do? They’re all owned by the same company so if declined at one, declined at them all.)
4. Multiple is spelled wrong for credit issues. This was my mistake so adding here.
5. Please change the down payment source to checkboxes like income. There may be multiple sources. Then borrowed down can be with it.
6. Credit issues should be checkboxes as well in case there’s multiple issues.
7. Under the credit items, please add a checkbox that says, “Check if Transunion is

being used and if so, enter in credit comments why.”

8. Please change Foreign income country input to “Foreign income/Down Payment Country”. If foreign funds is chosen for down payment, this is required, just like if foreign income is chosen.

9. We would like little info buttons (example:) that when clicked, there’s a pop up with information on it added to the following items: GDS, TDS, and all the notes, credit, income, down payment and general. This is the information we want each to say when clicked:

1. GDS: To calculate the Gross Debt Service ratio manually, you can use this formula: Mortgage payment + monthly property tax amount + monthly heating amount + 50% condo fees / gross monthly income x 100.

Generally, if heat is included in condo fees, you can exclude heat from the calculation.

2. TDS: To calculate the Total Debt Service ratio manually, you can use this formula: Mortgage payment + monthly property tax amount + monthly heating amount + 50% condo fees + all other monthly debt obligations including 3% of the balance of all revolving debt / gross monthly income x 100. Generally, if heat is included in condo fees, you can exclude heat from the calculation.

3. Credit notes: If your client has any derogatory credit, please explain how long ago it was and why it happened. If the client has a spouse that’s not on the application, please comment on their credit situation and why they’re not on the application. Leave blank if your client has great credit and no derogatory items.

4. Income Notes: Please comment if your client has any variance in income such as low YTD income compared to how much they should have made,

or any exceptions you'd like to request. Leave blank if everything is standard.

5. Down Payment Notes: Please comment on the source of the down payment if it is atypical in any way. Leave blank if everything is standard.

6. General Notes: If you require any exceptions or have any other information you think is critical to the decision to send an offer on your deal, please note it here. If there isn't anything that stands out, please leave it blank.

Add in Property Information, provinces drop down "Yukon", "Northwest Territories" and "Nunavut".

On the property Information screen, please add a request to upload 2 pdf documents:

- Service agreement/client engagement letter/consent form
- 1 client ID with picture

These are to be stored for 120 days after the closing date provided by the broker. The Deal should go into drafts if they don't have these uploaded. AI should scan the document to ensure the name is the same as what is uploaded. If it's not, it should provide both names to the Lender on the invoice.

Next to the submit button, or close to it - above or wherever works well, we'd like to add a checkbox saying "No lender exceptions required on this deal." It is auto checked if there are no comments added to any of the 4 notes sections.

Changes to Deal Room for Brokers:

1. Brokers should be allowed to edit deals on a submission until there's an offer on it.
2. Submissions and drafts can be deleted until an offer is accepted. If it was submitted, it's removed automatically from lender portal.

In the Lender section:

1. When a lender is sending an offer, we'd like our bps to be automatically deducted from their standard bps. So if they type in 100 bps into the input, and it's a 3 year term, it shows the deduction of 3 bps and confirms it will offer 97 bps. We still also need to provide the fine print from the last contract to be added in – this will happen shortly.
2. In a lenders offer, please add an input for "Lender Fee % if applicable". This is not a required field. They can enter a number up to one decimal point.
3. We'd like to add an auto-offer feature where if there's no comments on a deal in any of the comments sections, credit, income, down payment or general, and it matches with one of the Lenders saved favourites, it automatically sends an offer on that deal. The lender would need somewhere to save their standard offer for the applicable deal, such as 5 year fixed – this is the rate etc. An automated email would need to be sent out daily with the saved offer information asking to confirm the information and a link to change the information quickly. An optional end date can be chosen for the offers to be stopped by. Otherwise they continue until the lender changes or cancels them. There should be a delete button and edit button.
4. When the lender is sending an offer, the deal or filter information automatically is loaded to the offer entry. Exemple: If the loan product is a 5 year fixed, it would automatically populate 5 year fixed in the offer so the lender doesn't need to select it. It can be changed if they choose though. We'd also like for the other fields to remember the last response from that user. However, comments should be cleared every time.
5. We'd like to have the offers editable- and they can be edited until accepted. If the offer is edited, a notification should be sent to the Broker.
6. Please add all of the revisions we made above for the additional items in create

deal to the lender filter section.

Additional Changes:

1. We would like Prequals to be managed differently than other deals. This is identified by the checkbox in the property section of create deal for “prequal”.

These loans we want the lender to bid on it, but they should be The broker uploads a prequal, lenders bid on it and the offer says in fine print, “Rate is subject to change. COF is always recommended.” The broker has a button to move to a Live Deal where they add the address, closing date, COF date and then they can accept any of the offers that are already there. Add in fine print on offer the lender enters, “If the broker has asked a question in comments, please respond in comments or via a message to ensure the Broker is confident in your offer.”

2. We’d like to change Maturing deals from 4+ days to 2+ days.

3. Please remove the confirm lender button when an offer is accepted by a broker. The switch button is enough. The Lender should be notified automatically that the offer was accepted and an invoice created.

4. If the broker chooses to switch, the lender invoice that was created with the acceptance is cancelled and deleted from the invoices page and the lender portal is updated to say declined. No notification of the lender is required.

5. We would like Lender logos scrolling the bottom of login page - we could just have our logo scrolling initially but we need a way to add more as we get more lenders added.

7. Change loan link to LenderMatch™ and add logo. (Will provide logo) We need that updated on all communication etc. including emails.

8. For the broker admins, can you please add a field to show who the broker is?

9. Please hook up the messages in the contact us pages to be emailed to

support@lendermatch.ca. And add a comment on the bottom of each contact us page to say “Or email support@lendermatch.ca”.

10. We have the lendermatch.ca domain name registered; we’d like you to link the bubble version to that domain name please.
