Hi Ivan,

Overall, I do think this is a much better site than we had before in bubble. Thank you again for finding it and setting it up for us. Here's some things that need fixing and as noted below, I wasn't able to get into the lender portal to test it:

On create deal, can you please remove this as it no longer applies:

Credit Score *	Co-Borrower Credit
750	726
Credit Issues — check all that apply (Choose most severe and include in credit notes if multiple)	
☐ 30+ Day Lates	☐ 60+ Day Lates

Can you change this to say CCB (under 15 years old) Please:

☐ Self-Employed (Stated)
☐ Child Care Benefit (under 15)
☐ Long-Term Disability

Can you update this to say "Borrowed Downpayment"

☐ Borrowed

For the assets - I still want it available when Network isn't checked. As it is, the field only pops up if Network is checked. If Network isn't checked then the fields are not mandatory though - does that make sense?

Total value of assets (liquid assets only) *

\$ 27,000

Total value of all assets including non-liquid assets *

\$ Enter total assets value

☐ Applicant owns other properties

Can you please update these to be what we had before separating the two different incomes please:

☐ Commission☒ Passive Income☐ Rental Income☐ Self-Employed (Full Doc)☒ Passive/Retired Income☐ Child Support/Alimony

This should be Hobby Farm and Recreational Property:

Farm

Recreational

When I don't have an address in the property screen it should require the prequal button and it doesn't.

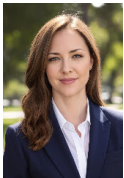

When I sign up 2 brokers with the same brokerage, there's no longer an admin as the first signed up. I'm wondering if we could actually have that managed in the Admin section that we have access to where we can mark brokers as admins for their brokerages. We also need a way to add new brokerages and lenders to LenderMatch in the Admin portal.

I couldn't use the staging website - it wouldn't allow me in on the admin side there, so I used lendermatch.ca...I hope that's not an issue...

When I signed up as a lender, and I approved it in the Admin portal, the lender email received 2 emails saying they'd been approved, one right after the other. Also, the lender email received a code before the approval. I think we were not requiring codes on lenders. I was unable to get into the lender portal because of this - there was nowhere to put the code afterwards.

Thanks.

Kind Regards,

Bonnie Casault
